

POLYETHYLENE WAX

■ Description

Is a low density ,medium molecular, high oxidation resistance Wax. It is fully compatible with low and High density polyethylene and also good compatibility with polypropylene.

■ Application

Serves as a highly effective external lubricant, pigment and additive concentrates for PVC. Can also be used as a lubricant and tac regulator for rubber.

Parameter	Unit	PXW-110
Appearance	-	Flake
Color	-	White
Melting Point	°C	100 - 110
Flash Point	°C	Min.280
Viscosity @140 °C	CPC	35.0 - 45.0
Density @20 °C	Gr/CC	0.92 - 0.94
Moisture Content		<0.2%

■ Packing

Laminated 25Kg PP Bags, Jumbo bags and palletised.

■ Quality Assurance

Our POLYETHYLENE WAX is of consistently high quality and deliver exacting specifications and high thermal stability.
