

■ Description

PE Wax Is a low density ,medium molecular, high oxidation resistance Wax. It is fully compatible with low and High density polyethylene and also good compatibility with polypropylene.

■ Application

Serves as a highly effective external lubricant, pigment and additive concentrates for PVC. Can also be used as a lubricant and tac regulator for rubber.

Parameter	Unit	PXW-110	PXW-115
Viscosity	cPs	10.0 - 100.0	10.0 - 100.0
Dropp Melting Point	°C	100 - 120	100 - 120
WI		>35.0	>35.0
Penetration	d.mm	10.0 - 12.0	<6.0
Density	g/cm3	0.90 - 0.95	0.90 - 0.95
Moisture Content	ppm	<300.0	<300.0
Form		Flake	Flake
Color		White	Briliant White

■ Packing

Laminated 25Kg PP Bags, Jumbo bags and palletised.

■ Quality Assurance

Our POLYETHYLENE WAX is of consistently high quality and deliver exacting specifications and high thermal stability.
